St. Louis, Missouri (August 1, 2005)-- Brand Services, Inc. recently opened an Insulation division to provide the company's growing customer base with additional industrial construction services. The Insulation division's Southwest offices are located in Pasadena, TX and Corpus Christi, TX. They serve Texas and Oklahoma. The Southeast offices are located in Baton Rouge, LA, New Orleans, LA, and Eldorado, AR and serve Louisiana, Alabama, Arkansas, and Mississippi.

"Our customers asked us to provide more, and we are pleased to meet that need," commented Guy Huelat, Southwest Regional Operations Vice President.

Brand hired Mike Jaramillo to lead its Southwest region Insulation division. Jaramillo and his project management and estimating team have a combined 67 years of experience in the industrial multi-services fields of scaffolding, insulation, and painting.

Eric Todd leads the Corpus Christi location, which holds the insulation and scaffold maintenance contract for Lyondell Equistar.

Dale Bergeron, Danny Schexnaydre, and David Schexnaydre, along with a full-service team of estimators and project managers, lead the rapidly growing Southeast Insulation division.

"Brand is proud to provide insulation services to our customers," said Marty McGee, Southeast Regional Operations Vice President. "We provide a valuable service utilizing a proactive safety program with stringent quality controls in place."

Brand's Insulation group recently completed an emergency job at an industry-leading refinery.

"The inspection discovery work uncovered process piping that had to be replaced immediately," said Doug Hughes, a Valero Representative at the Texas City Refinery.
