

Value Added Industrial Scaffolding Services

INTRODUCTION

Brand Energy & Infrastructure Services delivers value-added industrial scaffolding services that include a legacy of industry-leading safety performance, on-time project completion, and in-budget cost management. We leverage a series of state-of-the-art tools including CAD/FEA engineering design tools, material tracking applications, customer-centric estimating tools, and systematic project management methodologies to ensure that we consistently exceed expectations.

Brand's full-services are available to owners or contractors for maintenance, turnarounds, outages and capital projects. We have the industry's largest pool of skilled scaffold builders and project managers and over \$400MM of rentable assets ... all ready to serve.

Industrial Scaffolding Service Offerings

- Estimating, Project Consulting and Planning
- Multi-Design Scaffold Rental and Sales
- Erect and Dismantle Services
- On-Site Project and Inventory Management
- Certified Custom Engineering Designs
- Scaffold Safety Programs and Training

CASE STUDIES

MONROE POWER PLANT

Detroit, Michigan

Brand has earned a trusted relationship by providing safe and efficient scaffolding and industrial services to DTE (Detroit Edison Energy) for more than 20 years. Here at Brand we are raising the bar every time we provide services to our clients by out-performing our own performance in safety and efficiency. Take as an example the 750 MW DTE Monroe Power Plant, in Michigan. During a planned 2006 winter/spring outage, Brand erected 403,000 cubic feet of scaffold for pendant/tube replacement in one of the four boilers. Brand finished two days ahead of schedule saving Monroe Power Plant thousands of dollars... beating our own last outage record at Monroe Power Plant.

Scott Coakley, Manager

"The original scaffold build was scheduled for 96 hours and completed in 88 hours. The tear down of the scaffold was scheduled for 72 hours and completed in 32 hours. The erection and dismantling activity was the critical path for the outage and resulted in two days of savings. I could not have asked for better support from the Brand employees."

SYNCRUDE REFINERY

Fort McMurray, Alberta

For over a decade Brand has continued to be a proud industrial service provider to Syncrude, the world's largest oil-sands crude oil production facility. When the Syncrude 15-year-old coker platform needed to be replaced, Brand erected a scaffold landing platform 160' from grade and utilized a pneumatically operated swingstage suspended scaffold to access the remainder of the line. Brand specially designed an expandable coker platform that reduced the number of operators needed, shortened assembly time and improved weight-to-strength ratio, all while maintaining the existing 5,000-lb capacity.

Brand winner of Syncrude 2006 President's Award for Outstanding Safety Performance in a High Risk Project.
