

Excellence through Experience in Marine & Offshore Painting & Coating

INTRODUCTION

Brand Energy and Infrastructure Services, in uniting the collective expertise of Protherm, Industrial Specialists (ISI) and Tesco into the Brand family, combines over 70 years of industrial painting and coating experience. The result is the premier provider of industrial coatings that offers safety, quality and cost effective options to assist clients in achieving their objectives.

Brand's team is comprised of highly skilled personnel, with more than 1,700 painters and supervisors. Our training programs ensure that we provide highly-skilled professionals, including NCCER certified craft that are supported by 35+ NACE trained and certified inspectors. The Brand team delivers over 3.4MM painting labor hours annually utilizing our proven Quality Systems Program.

We leverage our experience, coupled with a successful track record and the use of sophisticated technology to meet all your painting requirements and exceed your expectations.

Industrial Coating Service Offerings

- Managed Maintenance Programs
- On Site Painting at Marine Fabrication Facilities
- Off Shore Painting Services
- Climate Controlled Off Site Blasting and Coatings Facilities
- Specialty Splash Zone Applications
- Drilling Equipment, Risers and Other Marine Equipment Painting
- Fireproofing Services
- Thermal Spray Aluminum and other Metalizing Applications

CASE STUDIES

AQUA AIR INDUSTRIES

Harvey, Louisiana

When Aqua Air, a leading diving-equipment provider, was faced with the challenge of coating and insulating its diving-chamber fleet, they turned to Brand. We used a highly specialized blasting and coating system for the exterior and interior of the chambers to maintain the ambient temperature at all times and to withstand harsh weather conditions. The exterior of the chambers were blasted, coated with Polyurea to act as an insulating barrier, and finished with a Polyutherane system. The interior surfaces were coated with non-toxic protective lining to keep the interior atmosphere safe for the divers.

Stacey Cruze, Owner

"With this project, Brand once again demonstrated both a deep understanding of specialized marine services, and an uncompromising commitment to quality."

MARINE FABRICATION SOLUTIONS

Gulf Coast

Brand is the preferred provider of painting and other related services at several of the major marine fabrication facilities in the Gulf Coast. Projects ranging from the largest semi-submersible and jackup drilling rigs to smaller, more complex modular packages, that are blasted and painted by our trained professionals. Related services include Thermal Spray Aluminum (metalizing), Fireproofing, vessel lining and specialty splash zone applications.

Brand is also able to offer off site blasting and painting for specialized equipment, pipe coatings and other applications. Several off site locations offer climate controlled facilities and all of our locations are set up to deliver high rates of production even during periods of inclement weather. Utilization of our off site facilities can reduce space constraints and improve productivity for time sensitive projects.
