

## Excellence through Experience in Marine Vessel Painting & Coating Applications

### INTRODUCTION

Brand Energy and Infrastructure Services, in uniting the collective expertise of Protherm, Industrial Specialists (ISI) and Tesco into the Brand Family, combines over 70 years of industrial painting and coating experience. The result is the premier provider of industrial coatings that offers safety, quality and cost effective options to assist clients in achieving their objectives.

Brand's team is comprised of highly skilled personnel, with more than 1,700 painters and supervisors. Our training programs ensure that we provide the highest skilled professionals, including NCCER certified craft that are supported by 35+ NACE trained and certified inspectors. The Brand team delivers over 3.4MM painting labor hours annually utilizing our proven Quality Systems Program.

Brand leverages our experience, coupled with an extraordinary track record and the use of sophisticated technology to ensure that all your painting requirements are met and your expectations are exceeded.

### Industrial Coating Service Offerings

- Hull Surface Preparation and Painting
- Antifoulant Applications
- Decks and Non-Skid Surfaces
- Ballast Tanks
- Potable Water Tanks
- Special Cargo Liners
- Carpentry Services
- Specialty Coating and Thermal Spray Applications
- Ultra High Pressure (UHP) Water Blasting
- Lead Abatement Services

# CASE STUDIES

## INNOVATIVE SURFACE PREPARATION TECHNOLOGIES

Brand utilizes the latest technologies to improve safety, accelerate productivity and reduce cost. We utilize robotic steel grit/shot blasting for high productivity and dust free surface preparation on deck surfaces. This eliminates interference with other crafts in the immediate area during blasting. Ultra high pressure (UHP) Water Blasting is a technology utilized for surface preparation. Water pressures of 30-60K psi are available. Robotic UHP surface preparation is also available for hulls during refurbishment.

## OFF-SITE BLASTING & PAINTING

Marine painting and coating operations nearly always require completion on a fast-track schedule. It's not unusual if a 24/7 schedule is required, and very often there are call-out projects requested that need to be done, with less than even a day's notice from the owner.

Brand understands these demands are just part of the course for being a viable supplier of services in this market. Our team has internal communications established, which allow us to mobilize and meet our customer's expectations. We have the required labor, supervision and equipment resources available to receive and complete, in a timely manner, these short-notice projects. In addition, we will do them without having to sacrifice our standards of high quality, safety, and competitively priced service deliverables.
