

Excellence through Experience

INTRODUCTION

The recent addition of the collective expertise of Protherm, Industrial Specialists (ISI) and Tesco to the Brand Energy & Infrastructure Services family allows the premier provider of industrial coating and painting to now offer their clients 70 years of combined experience. The result is award-winning safety, quality and cost effective options to assist clients in achieving their objectives.

Brand's pool of highly skilled personnel consists of over 1,700 painters and supervisors. Our training program certifies that we provide customers highly-skilled professionals, including NCCER certified craft, all of whom are supported by over 35 NACE trained and certified inspectors. The Brand team delivers over 3.4MM painting labor hours annually, utilizing our proven Quality Systems Program.

We leverage our experience, coupling a successful track record with the use of sophisticated technology, to meet all your painting requirements and exceed your expectations.

Industrial Coating Service Offerings

- Managed Maintenance Programs
- Off Site Blasting and Coatings Facilities
- Turnaround/Outage Painting Services
- Corrosion Under Insulation (CUI) Programs
- Tank Maintenance and Turnarounds
- Specialty Surface Preparation and Coating Applications

CASE STUDIES

INNOVATIVE TANK PAINTING & LINERS

Nation-Wide Capabilities

Tank terminal operators, as well as industrial facility owners who operate large above ground tanks for product storage turn to Brand for their Tank Maintenance and Turnaround projects. Brand works with the latest technologies to improve safety, accelerate productivity, and reduce cost. We employ robotic steel grit/shot blasting for high productivity and dust-free surface preparation. We utilize a vast array of state-of-the-art surface preparation and coating methods, including heat induction units, for the removal of glass-reinforced tank liners. Our teams work together with owners and tank builders to enhance safety, maximize the quality of the finished product, minimize tank outage durations and reduce waste disposal requirements.

HALLIBURTON

Galveston, Texas

When the global oil and gas industry leader, Halliburton requires any blasting and coating services for their world class facilities, they regularly turn to Brand. Most recently, Halliburton contracted Brand to provide blasting and painting services to its cement/mud bulk plant in Galveston, TX. We were challenged with budgetary and time constraints, as the businesses in the surrounding areas and the plant were all in full operation. Brand's highly skilled team efficiently confined the painted area properly, to ensure the safety of both plant staff and personnel from the surrounding businesses. Our experienced team successfully performed sandblasting and applied a four coat polyurethane coating system to the entire plant with zero lost time incurred.
